STATE BOARD EXAM INFORMATION

1. New Name - The Board of Directors of the National Council of State Boards of Nursing, Inc., have announced a new title for the nursing licensing examinations. Effective immediately, these examinations will be titled NATIONAL COUNCIL LICENSURE EXAMINATIONS. The type of licensure will be designated by the initials "R.N." or "P.N." as in the following acronyms: NCLEX-RN, NCLEX-PN. The title change was made to reflect the ownership and control of the examination rather than the process of test development as indicated by the SBTPE title. (Excerpted from Georgia Board of Nursing Newsletter, Winter, 1982.)

2. Scoring System for February and April, 1982. Notification was received from the National League for Nursing pertaining to scoring the licensing examination. It reads: "In scoring the tests, one point is given for each correct answer. If you mark more than one answer to a question or if you do not answer a question, you will receive no credit for that question. There is no penalty for wrong answers. The scores derived from this process are raw scores which are converted to standard scores and reported to the licensing jurisdiction. Standard scores can conceivably range from 0 to 999. The range of standard scores is affected by the length of the test. Therefore, the lowest and highest possible standard scores actually vary from one test to another."

3. Later this year, candidates desiring to write the NCLEX will apply directly to the National Council of State Boards of Nursing, Inc. This new system of direct application will initiate a method to establish a data bank for use by member boards to ease their workload in getting information about those who wish endorsement. It also enables the National Council to meet its contractual obligations to CTB/McGraw-Hill for payment in 30 days after scoring and it results in a lower fee per candidate. However, in addition to direct application for the licensing examination, the candidate will still have to make application and pay a fee for licensure to the State Board of Nursing.

More information on this will be sent at a later date.

LICENSE RENEWAL SYSTEM CHANGE

Senate Bill 16, which became law on September 28, 1981, states: "The division shall provide clerical and other staff services relating to the issuance and renewal of licenses for all the professional licensing and regulating boards and commissions assigned to the division. The division shall perform the financial management and clerical functions as they relate to the issuance and renewal of licenses and certificates. 'Issuance and renewal of licenses and certificates' means the ministerial function of preparing and delivering licenses or certificates....The director of the division of professional registration shall promulgate rules and regulations which designate for each board or commission assigned to the division the renewal date for licenses or certificates...."

Interpretation: The Board of Nursing shall handle license renewals this year, 1982-83, the same as it has been accomplished in the past. However, effective dates of the licenses will differ in order to allow the division to assume clerical responsibilities for the next licensing period. The renewal period for R.N.'s will be for 10 months - from July 1, 1982 to April 30, 1983, for this coming year only. Thereafter, licenses will be issued for a 12 month period from May to April 30. The renewal period for LPN's will be for an 11 month period - July 1, 1982 to May 31, 1983, and thereafter for a 12 month period, from June 1 to May 31. Renewal fees will be \$12.00 for a year and pro-rated for the renewal period which is less than one year.

IMPORTANT NOTE: Please keep this office informed of any change in name and/or address. We must have your current address in order to send your renewal notice.

Senate Bill 16 requires each licensing board to file an administrative rule stating the procedure for handling of public complaints. The proposed rule will be published in the March 1, Missouri Register and will become effective May 13, 1982. We urge your review and comments concerning this rule.

X The Board received many requests from nurses asking if certain procedures are considered "legal" within the framework of the Nursing Practice Act. The Nursing Practice Act definition of professional nursing was purposely written broadly to allow flexibility in nursing practice. It was neither the intention of the authors nor of the Board of Nursing to produce a "laundry list" of procedures that would limit the scope of nursing practice. The Board takes the position that the dimensions of an individual nurse's practice should be based upon the nurse's education, knowledge, competence, interest and in consultation with nursing organizations. Practice decisions of the individual nurse shall be made in order to provide safe health services for the consumer.

At its August meeting, the Board issued the following policy statement:

"The Missouri State Board of Nursing has the inherent authority to express its views regarding the practice of nursing within the state to protect the public health, safety and welfare. The Missouri State Board of Nursing does not support practices which could compromise the professional integrity of the nurse and feels that the nurse should not be placed in areas where inadequate knowledge and orientation is available.

By assigning a nurse to an area where he/she has inadequate knowledge and skills, the licensee is in jeopardy and the Missouri State Board of Nursing could, by Chapter 335.066.2(5), RSMo Supp. 1981, revoke or suspend the license if a complaint is filed against the nurse."

At its January 1982 meeting, the Board added the following clarification statement:

"It remains a mutual responsibility of the staff nurses and nursing service administration concerned to assess the adequacy of individual nurses' knowledge and orientation prior to practice on any given unit."

NEW HAMPSHIRE SUNSET

Because of concern about the legal implications of the sunseting of the New Hampshire Board of Nursing, the Missouri State Board of Nursing sent a letter to the New Hampshire officials, stating:

"If the New Hampshire Board of Nursing is no longer in existence after April 1, 1982, the State of Missouri cannot license nurses by endorsement from New Hampshire."

CALIFORNIA STATE BOARDS

The State of California, because of allegations that the 1981 licensure exams had a discriminatory impact on minorities and other protected groups, rescored the R.N. exams for candidates sitting in July or February, 1981. Upon review of the information supplied by the California Board of Registered Nursing, the Missouri State Board of Nursing issued the following statement:

"The Board does not approve the California rescored examination as a basis for licensure by endorsement in Missouri, since the rescored examination differs significantly from the national licensure examination approved by the Board."
California does supply both sets of scores when a person is applying for endorsement to another state.

*****DEFINITION OF FACULTY*****

The Minimum Standards for Programs of Professional Nursing state that "All faculty members shall be prepared one degree beyond the level for which the student is being educated (ADN and diploma programs require baccalaureate prepared faculty, BSN programs require master's prepared faculty)." This statement has caused concern in schools of nursing which employ lab or teaching assistants and generated a discussion at the January Board Meeting.

The Minimum Standards define full-time faculty members as those "whose primary responsibilities are to develop and implement the curriculum of the professional nurse program. Part-time faculty are those who participate in the development and implementation of the curriculum on a part-time basis."

"Personnel policies shall be in writing and in compliance with the sponsoring institution."

Faculty are therefore, persons who comply with the definition in the Minimum Standards and personnel policies of the governing institution.

NURSING STUDENT ELECTED TO NATIONAL ADVISORY BOARD

The Board has received notification that Geraldine Krause, 3rd semester nursing student at St. Louis Community College at Meramec, St. Louis, has been elected to represent AD Nursing on the National Advisory Council on Nurse Training. She represents approximately 100,000 students enrolled nationally in AD Nursing Programs. There are only three nursing students in the nation on this council (one from AD, one from a diploma school and one from a baccalaureate program). Our congratulations!

FROM THE EXECUTIVE:

To Outgoing Board Members: It's a time for goodby's and thank-you's! As a new Board is on the scene, we express our appreciation for the long hours spent and the hard work expended by a dedicated group of nurses who have served the public and the profession of nursing over the past four years. You shall be missed and you are appreciated.

To New Board Members: And it is a time of welcome! Five new Board Members have been named by the Governor. Four of these attended the January Board Meeting and have been confirmed by the Senate.

To Bonnie: Welcome also to Bonnie Greer, the Associate Executive Director for Education. Bonnie has already contacted most schools of nursing in the state and is anxious and willing to provide any assistance possible to nursing schools and students.
