Message from the President

by Rhonda Shimmens, RN-C, BSN, MBA

Enhanced Nurse Licensure Compact

In the last newsletter, I indicated that the members of the Missouri State Board of Nursing support the Enhanced Nurse Licensure Compact. Missouri has been a member of the Nurse Licensure Compact (NLC) since 2010. Advances in technology, along with an increasingly mobile nursing workforce and patient population, created the necessity for breaking down unnecessary barriers to interstate practice. The Nurse Licensure Compact (NLC) creates a system that allows nurses to practice freely among participating states while still allowing states to retain their autonomy through enforcement of their nurse practice act. This interstate compact has the ability to remove the nurse licensure barrier to practice for more than 4.5 million nurses.

This year and in recent years, we have seen hundreds of telehealth bills in more than 44 states, all with the goal of enabling telehealth. Given the mobility of society and the capabilities which advanced technology brings, telehealth is proliferating at a tremendous rate. The current health care environment begs the question, "How do regulators facilitate cross-border practice of nursing whether physically or via telehealth and ensure that critical systems are in place to keep patients safe?" We believe the answer is the nurse licensure compact.

The Board’s rationale for supporting the NLC is to eliminate redundancy and duplicative regulatory processes and eliminate unnecessary fees. The Board found that the NLC improves patient access to licensed nursing care especially during a disaster or other times of great need and it assists military spouses by decreasing the amount of time, paperwork, and costs necessary to begin immediately practice nursing as they often relocate every two years.

State boards of nursing who adopt the NLC are required to participate in the national nurse license database known as Nursys®, which authorizes sharing licensure and disciplinary information between NLC states. Missouri has been participating in this database since 1999 by electronically submitting licensure and discipline data on a daily basis.

Twenty-five states adopted the current NLC, but the question remained how to craft an enhanced NLC that eventually all states could adopt. The National Council of State Boards of Nursing (NCSBN) set out on a journey to answer this question. Our executive director, Lori Scheidt, was involved from the onset of this journey, which took most of two years to complete. The Enhanced Nurse Licensure Compact (ENLC) was the result of collaboration, hard work, and compromise from almost all of the 50 states and U.S. territories who are members of the National Council of State Boards of Nursing (NCSBN).

On May 4, 2015, NCSBN’s Delegate Assembly voted to approve the Enhanced Nurse Licensure Compact (ENLC). The vision was for all states to enact and implement the ENLC by December 2018. To join the ENLC, each state must put the entire ENLC into its statute.

The ENLC puts the uniform licensure requirements in the actual compact rather than in rule. The uniform licensure requirements are only for issuance of a multistate license. It does not prevent a state from issuing a single state license. It also requires all members of the ENLC to obtain and submit criminal background checks prior to issuing a license, and includes improved dispute resolution processes.

More than 88 percent of nurses surveyed nationwide support the NLC. The American Hospital Association and the American Telemedicine Association support the NLC, as does the American Medical Association. The American Medical Directors Association and the American Society for Healthcare Human Resources support the NLC.

by Lori Scheidt, Executive Director

Board Elects Officers at their June 2015 Board Meeting

Rhonda Shimmens was re-elected as President. Ms. Shimmens received a Bachelor of Science Degree in Nursing Science, and an MBA with an emphasis in Health Management. She is board certified in medical surgical nursing and ambulatory nursing and is currently the Manager of Outpatient Surgery and Post-Anesthesia Care Unit at SSM Health-St. Mary’s Hospital Jefferson City. She has served on the board since April 2009.

Mariea Snell was elected Vice-President. Dr. Snell is the coordinator of the Doctor of Nursing Practice program for Maryville University. In addition to her faculty and administrative role, she practices as a Family Nurse Practitioner for Peoples Health Centers in St. Louis. She holds a doctorate in nursing from St. Louis University, a master’s of science in nursing from Indiana State with a concentration in family practice and a bachelors in nursing from Barnes Jewish College of Nursing at Washington University Medical Center. Dr. Snell has extensive experience in research, education and community health. She has been on the board since February 2013.

Alyson Speed was elected secretary. Ms. Speed is a licensed practical nurse with CoMo Cubs Pediatrics in Columbia. She is pursuing a Bachelor’s degree in business with an emphasis on healthcare administration from Columbia College. She has served on the Board since January 2004.

The Missouri State Board of Nursing (Board) is aware that there can be confusion regarding the difference between the Board and nursing organizations or associations. This article provides a brief summary of the role of the Board and the role of associations, how they differ and what they have in common.

• The Missouri State Board of Nursing is a regulatory board. Its purpose is to protect the public. It is an agency of state government that was established through enactment by the Missouri General Assembly (the state legislature) of a law that mandates both the structure of the Board and the Board’s functions. The Board consists of nine individuals, five of whom must...

Facilitation of the Educational Pathway for Military Service Members and their Families

Military service is at the forefront of awareness and much is said about the difficult and sometimes even tragic transition faced by service members from active duty to civilian life. Many military service members return home with extensive training and experience that may, if analyzed and applied appropriately, facilitate career advancement and expedite the process to licensure or certification. The need to explore, analyze and award as much educational credit as possible for military training and experience is not a new concept. Much has been written about this, bills have been passed, and work is in progress to facilitate this transition.

Missouri passed legislation in 2013 (Senate Bill 106) stating that the Coordinating Board of Higher Education would establish a policy that requires public post-secondary institutions to award credit for military training and experience. Missouri statute section 173.1158 (1) RSMo requires that the Coordinating Board for Higher Education (CBHE), by January 1st, 2014, have policies in place that require public institutions of postsecondary education, to include Missouri public universities, colleges, technical and technical schools, to award credits for military training or service that meet the standards of the American Council on Education (ACE) or equivalent standards. Credits awarded must also meet the scope and mission of the awarding institution. Missouri statute section 173.1158 (2) RSMo requires implementation by the beginning of the 2014-2015 academic year. It is important to note that the Missouri Department of Higher Education, the administrative arm of the Coordinating Board of Higher Education (CBHE), which has responsibility for coordination and oversight of all post-secondary education in this state, established Policy Guidelines for Awarding Educational Credit for Military Training and Experience.

Furthermore, Missouri Revised Statutes – Chapter 324, section 324.077(1) requires that as of January 1st, 2014, professional licensing boards or commissions in this state, upon presentation of satisfactory evidence, accept military credits as long as credits meet current standards for licensure or certification. Missouri State Board of Nursing (MSBN) rules are in place that facilitate the acceptance of military service members who present evidence of successful completion of the Army Practical Nurse Program, as indicated under 20 CSR 2200-40200(1)(B) – Missouri Nursing Practice Act, April 2014.

In 2013, the National Council of State Boards of Nursing (NCSBN) conducted an expansive comparison of military health care training/occupations with the requirements of the National Council of State Boards of Nursing (NCSBN, 2013). In 2014, representatives from Illinois, Indiana and Ohio began a collaboration with the Military Family Research Institute at Purdue University, West Lafayette and founded the Multi-State Collaborative on Military Credit (MCMC). Facilitation of military credit transfer, as well as legislative language that recognizes military training and experience as an avenue of credits toward degree/credential completion through application of innovative assessment models (MCMC Provenance, 2014).

Missouri Department of Higher Education (MDHE) has been in participation with the Multi-State Collaborative on Military Credit (MCMC) for the state of Missouri. In 2015, the MO-MCMC was founded with the University of Missouri Colleges and universities have been working with MCMC workgroups since 2013. Overarching goals include better utilization of prior military training and experience in auguring of credits toward degree/credential completion through application of innovative assessment models (MCMC Provenance, 2014).

Missouri Department of Higher Education (MDHE) has been in participation with the Multi-State Collaborative on Military Credit (MCMC) for the state of Missouri. In 2015, the MO-MCMC was founded with the University of Missouri Colleges and universities have been working with MCMC workgroups since 2013. Overarching goals include better utilization of prior military training and experience in auguring of credits toward degree/credential completion through application of innovative assessment models (MCMC Provenance, 2014).

In June 2015, Bibi Schultz, Education Administrator for the Missouri State Board of Nursing, was appointed to serve on the MO-MCMC Steering Committee. Ms. Schultz now also serves on the Multi-State Collaborative on Military Credit – Missouri State Plan (April 2014) and serves on the Missouri Department of Higher Education – Multi-State Collaborative on Military Credit – Missouri State Plan (April 2014). Ms. Schultz also serves on the Missouri State Board of Nursing, was appointed to serve on the Multi-State Collaborative on Military Credit – Missouri State Plan (April 2014) and serves on the Missouri Department of Higher Education – Multi-State Collaborative on Military Credit – Missouri State Plan (April 2014).

The Missouri State Board of Nursing has taken the lead in participation with the Multi-State Collaborative on Military Credit (MCMC). The Missouri State Board of Nursing is the only licensing board that will offer a pathway to highly accelerated completion of the practical nurse curriculum for military service members in Missouri. Eligible students would include military service members who completed military health care training in a variety of settings. Several Missouri programs of vocational nursing have expressed interest in development and offering of this option.

Much progress has been made in acceptance of military credits, many challenges must be addressed and bold steps must be taken to bring about necessary change. It is important that policies and guidelines are carefully followed to ensure that military credits are appropriately evaluated, optimally applied and that educational standards for licensure or certification are consistently met.

I am always on the lookout for stories. Ya know, being a storyteller, it’s kinda what I do. This one came from a nurse I met this summer in Chicago. She can tell it better than I can, and she’s a storyteller, it’s kinda what I do.

This one came from a nurse I have a particular fondness for. At shift change and in front of a patient and his wife, my fellow nurse used some common abbreviations while giving me report. Such as CABG (Coronary Artery Bypass Graft) and HTN (Hypertension, and CHF (Chronic Heart Failure). After report, I was doing my assessment of my patient when his wife asked, “Could you please stop referring to my husband as a vegetable?” I had no idea what she was talking about.

Confused and bewildered, she continued, “every shift, you nurses say ‘this is Mr. Jones and he is a cabbage x5’” Right then, I knew what she was referring to, we say CABG x 5 meaning the patient is post op Coronary Artery Bypass Graft. x five, those were many vessels were used.

I apologized over and over and gave her a full explanation of our terminology. She thanked me and we both wished someone had taken the time to explain the terminology earlier.

Faithful reader, this was such an honest mistake, right? It was a simple oversight on the part of the nursing staff that the language they use every day is foreign to patients and families. I hope we can all remember that the populations we serve aren’t always fluent in medicales.

Yet, as a human being who can feel empathy, doesn’t your heart just go out to this wife? And to the nurse? We all know the seriousness of cardio surgery. We can all imagine the fear and nerves a family member (much less a spouse) would have seeing a very ill loved one suffering. Personally, if my spouse was having open heart, I’d be a nervous wreck.

But then? In the ultimate case of adding insult to injury, the family member perceives the communications from caregivers as name-calling; the lowest form of negative communication. I mean, seriously? If that wife had gotten so furious over the mistake that she would have acted ugly, wouldn’t she have been acknowledged as a family member.

That terminology “human vegetable” became popular a few decades ago. And it carries a horrifying connotation! If a family member hears a loved one being referred to as a vegetable, it can bring about all types of mental images that may not even be accurate.

Please be mindful that your words can (and often will) be unfamiliar to patients and families. The better explanations given, the more we can avoid misunderstanding and instead of creating greater anxiety, we can help reduce stress during the most vulnerable of times.
their ways of accomplishing this goal are significantly different.

- The Board exists solely to enforce the law and rules that regulate practice. The Board has the authority to establish requirements individuals must meet to obtain a license to practice nursing. The Board approves pre-licensure nursing education programs, oversees the licensure examination for nurses, and takes disciplinary action when a licensee violates the law. These activities help to assure that only qualified individuals provide care to the public.

- Associations bring nurses together to develop professional standards and practices, codes of ethics, and promote the role of the Advanced Practice Registered Nurse in the community. They advocate and deliver high quality health care to patients across their lifespan from pregnancy to geriatrics in a variety of settings. AMNP represents the role of the Advanced Practice Registered Nurse in the community through leadership, legislative activities and continuing education while promoting and advocating for excellence.

Purposes:
- To advance, support, and promote high standards of care delivered by nurse practitioners and clinical nurse specialists.
- To promote excellence in practice, education and research.
- To serve as a resource for nurse practitioners and clinical nurse specialists.
- To provide leadership and represent interests of advanced practice registered nurses before the executive and legislative branches of the government on local, state, and federal levels.
- To provide health care policy by educating and disseminating information to stakeholders about the progression, capabilities, and high standards of care provided by the nurse practitioner and the clinical nurse specialist.
- To advocate for access to safe, effective, patient centered, timely, efficient, equitable, quality, and cost effective health care.
- To provide continuing education for the practice of the nurse practitioner and the clinical nurse specialist to assist and support knowledge, including professional growth in practice registered nurses and clinical nurses.

You may contact them at www.am-np.org, a Facebook page under the Association of Missouri Nurse Practitioners, a LinkedIn page and Twitter.

AMPN is a member of the American Association of Nurse Practitioners (AANP). AANP is the national voice of the Nurse Practitioner (NP) profession and represents over 66,000 members across the country. AANP's mission is to advance the profession of nurse practitioners and clinical nurse specialists.

Missouri Association of Nurse Anesthetists (MoANA)
The Missouri Association of Nurse Anesthetists (MoANA) is a member of the American Association of Nurse Anesthetists (AANA). AANA is the professional organization for more than 49,000 Certified Registered Nurse Anesthetists (CRNAs) in the U.S. MoANPs recognize over 100 CRNAs licensed in Missouri.

MoANA’s mission is to advance the profession of clinical nurse specialists. MoANA's mission is to promote nursing leadership today, while preparing nursing leaders for tomorrow. To achieve this, MoANA:
- serves as a supportive, networking resource
- forms strategic relations and partnerships with other organizations
- promotes the role of nurses in leadership positions
- engages and energizes nurse leaders to envision and develop innovative and creative solutions to present and future nursing issues.

An organization since 1979, MoANL keeps members apprised of legislative and regulatory issues and advocates that are important to nurses, nursing organizations, and the public.

For more information about MoANA contact Carol Kemna at 772-353-8760 or visit our website: www.moana.org.
Executive Director continued from page 5

representation on state, regional and national committees and task forces. We also work to build strategic relationships with other nursing and health care organizations such as the Missouri Nursing Coalition, Missouri Action Coalition, Missouri Center for Nursing, schools and regulatory bodies. Through conferences and our on-line database, MoNL promotes educating, mentoring and developing excellent nurse leaders.

"MoNL membership offers nurse leaders and emerging nurse leaders the opportunity to share lessons learned as well as to collaborate for a better tomorrow," says MoNL president Vickie Smith, RN, MSN, MSN, ACNS-BC, NEA-BC. "The value in health care today is in Nursing. There is no better time to join MoNL than now. Membership is just $25 per year. To learn more about MoNL, visit www.moonsalpn.org or contact Sharon Burnett at 573-893-3700, ext. 1304 or sburnett@mail.mhnnet.com.

The Missouri State Association of Licensed Practical Nurses, Inc. (MoSALPN)
The Missouri State Association of Licensed Practical Nurses (MoSALPN) is the official state association representing the Licensed Practical Nurse. The motto of the association is "service above self." MoSALPN's job is to raise the standards of the profession of practical nursing by providing leadership through an ongoing organization whose purpose is to represent the LPN in the workplace, and at all levels of government both local and national.

The Licensed Practical Nurse continues to be the bedside nurse, or office nurse or specialty nurse especially trained to perform those duties that promote the health and wellbeing of those they care for. In the medical world we live in, the LPN is regulated in the activities that he/she can perform. It is through the ongoing efforts of this Association that the LPN is protected and respected. MoSALPN continually monitors activities at the state and national capitol as bills are introduced that affect the practice of the LPN.

It is vital to the continued success of this Association that each LPN in the state make it a point to join the association so that we can continue to represent your profession not only at the local level but statewide, or in the future, with other nursing associations in the state. To begin your membership, or to renew it, contact Vickie Smith at mosalpnexec@comcast.net or by calling 573-636-1304. Through your continued or newfound support, we will be able to continue in our mission to represent you and your profession.

Missouri Center for Nursing
The Missouri Center for Nursing is a non-profit organization that provides opportunities for continuing education among nursing and health stakeholders to advance a culture of health for all Missourians. The vision of the Center is for each LPN in the state make it a point to join the association so that we can continue to represent your profession not only at the local level but statewide, or in the future, with other nursing associations in the state. To begin your membership, or to renew it, contact Vickie Smith at mosalpnexec@comcast.net or by calling 573-636-1304. Through your continued or newfound support, we will be able to continue in our mission to represent you and your profession.

Pursuant to Section 355.064.2 RSMo, the Board “may cause a complaint to be filed with the Administrative Hearing Commission as provided by chapter 621, RSMo, against any holder of any certificate of registration or authority, permit, or license required by sections 355.011 to 355.096 or any person who has failed to renew or has surrendered his certificate of registration or authority, permit or license” for violation of Chapter 335, the Nursing Practice Act.

**Please be advised that more than one licensee may have the same name. Therefore, in order to verify a licensee’s identity, please check the license number. Every case contains factors, too numerous to list here, that can positively or negatively affect the outcome of the case. The brief facts listed here are for information only. The results in any one case should not be viewed as Board policy and do not bind the Board in future cases.**

CENSURE

Crawford, Jeannette M.
St. Charles, MO
Registered Nurse 029995
Licensee practiced nursing in Missouri without a license from May 1, 2013, to April 14, 2015
Censure 06/25/2015 to 06/26/2015

Gros, Noel E.
Jefferson City, MO
Registered Nurse 145644
Licensee practiced nursing in Missouri without a license from May 1, 2013, to May 4, 2015
Censure 06/16/2015 to 06/17/2015

Helmoring, Karla K.
Linn, MO
Licensed Practical Nurse 042427
On November 25, 2013 Licensee assumed responsibility for a patient who reported complaints with his ear. Licensee did not document correctly that the patient’s physician was notified, and did not document evaluation of the patient correctly.
Censure 03/31/2015 to 08/01/2015

Burris, Avalas L.
Kansas City, MO
Licensed Practical Nurse 046088
Licensee practiced nursing in Missouri without a license from June 1, 2013, to June 30, 2013
Censure 08/19/2015 to 08/20/2015

Metger, Rena H.
Huntsville, MO
Registered Nurse 200520680
On June 3, 2013, Licensee was administering Flagyl to a patient by IV. Licensee hung the IV bag and documented the administration of the medication. When Licensee was getting ready to leave her
CENSURE continued...

shift, she looked into the patient’s room and saw the IV bag still hanging and documented a stop time, indicating the administration was finished. It was later discovered that the Flagyl had failed to infuse and that the IV bag was still full. On July 25, 2013, Licensee was caring for a patient who had orders to receive a drug via intravenous administration. Licensee received the oral form of the drug from the pharmacy to administer to the patient. She scanned the barcode on the medication and the medication into the electronic medication administration record. Licensee received an error message, but Licensee override the error message. Licensee then gave the medication to the patient via intravenous administration. When Licensee received the error message from the medication bar code system, Licensee failed to confirm that she was giving the right medicine to the right patient via the correct route resulting in improper patient care.
Censure 07/15/2015 to 07/16/2015

Walden, Elizabeth A.
Excelsior Springs, MO
Licensed Practical Nurse 046306
Licensee practiced nursing in Missouri without a license from June 1, 2014, to June 22, 2015
Censure 08/11/2015 to 08/12/2015

Hughes, Jane N.
Roeland Park, KS
Registered Nurse 130899
Licensee practiced nursing in Missouri without a license from May 1, 2013, to May 11, 2015
Censure 06/25/2015 to 06/26/2015

Collins, Karen J.
Stockton, MO
Registered Nurse 122405
Licensee practiced nursing in Missouri without a license from May 1, 2013, to April 13, 2015
Censure 06/25/2015 to 06/26/2015

Miller, Shari L.
Marshfield, MO
Licensed Practical Nurse 044097
Licensee practiced nursing in Missouri without a license from June 1, 2012, to April 13, 2015
Censure 06/25/2015 to 06/26/2015

Thompson, Jean E.
St. Louis, MO
Registered Nurse 149676
Licensee practiced nursing in Missouri without a license from May 1, 2013, to May 11, 2015
Censure 06/25/2015 to 06/26/2015

PROBATION

Spaulding, Debra L.
Hazelwood, MO
Registered Nurse 127214
On January 8, 2015, Licensee withdrew unit stock insulin and injected herself in her abdomen. Licensee did not document this occurrence and was not a patient. Licensee admitted that she had injected herself and stated she had done so because although she did not have a prescription for insulin that she usually administered by "pen," she did not have any of her own insulin with her on that particular morning.
Probation 06/25/2015 to 06/25/2016

Hummer, Patricia E.
Saint Louis, MO
Registered Nurse 110997
On November 19, 2014, Licensee accessed medical records for twenty (20) patients, only six (6) of whom were assigned to her caseload. Licensee had a previous access violation in February 2013. Licensee was verbally reprimanded and given further education on medical record access. Licensee received further training on medical record access in August 2013. In Fall 2013 and Fall 2014, Licensee participated in BLITZ training which included mandatory HIPAA education. Licensee admitted that she had accessed the twenty-two medical records on November 19, 2014, and knew that she should not have accessed them.
Probation 09/27/2015 to 09/27/2016

Jameson, Sarah LaVerne
Hillsboro, MO
Registered Nurse 2009931404
On or about October 7, 2014, Licensee was observed by coworkers to have slurred speech, be off balance, and have trouble keeping both eyes open causing co-workers to believe she was impaired. Licensee was requested to take a drug screen, which was positive for opiates.
Probation 09/27/2015 to 09/27/2020

Walker, Sarah Mae
Eldon, MO
Licensed Practical Nurse 2004024252
Licensee pled guilty on May 23, 2006, to two (2) counts of the class C misdemeanor of assault in the third degree. On June 13, 2012, Licensee pled guilty to the class B misdemeanor of driving while intoxicated - drug intoxication. Licensee pled guilty to driving while under the influence of Soma. On May 9, 2013, Licensee pled guilty to the class C felony of possession of a controlled substance. Licensee pled guilty to possessing methamphetamine On May 10, 2013, Licensee pled guilty to the class C felony of possession of a controlled substance. Licensee pled guilty to possessing Lorazepam. On August 8, 2013, Licensee pled guilty to the class D felony of leaving the scene of a motor vehicle accident.
Probation 06/01/2015 to 06/01/2020

Tharp, Lindsey Noodle
Lees Summit, MO
Registered Nurse 2005026893
In Mid-October 2013, co-workers began to have concerns about licensee's administration and wasting of narcotics and notified officials. A medication audit revealed licensee had several discrepancies in her dispensing of narcotics and was wasting medications far above the rate of the other peers. A review of Licensee’s documentation revealed that 5.5 mg of Dilaudid and 9 mg of Morphine were unaccounted.
Probation 09/20/2015 to 09/29/2018

Partin, Laura A.
Queen City, MO
Licensed Practical Nurse 042289
On July 21, 2014, Licensee turned in skin assessments that had been performed on some of her patients. On July 22, 2014, the Director of Nursing reviewed the skin assessments and discovered that Licensee had turned in some skin assessments which had completion dates of July 22, 2014. Licensee turned in the same skin assessment report for patient WS with a completion date of July 22, 2014. Licensee turned in a skin assessment for patient ES which was completed on July 21, 2014. Licensee turned in the same skin assessment report for patient ES with a completion date of July 22, 2014. Licensee turned in a skin assessment for patient KL which was completed on July 22, 2014.
Probation continued on page 11
was completed on July 21, 2014. Licensee turned in the skin assessment report for patient KL with a completion date of July 25, 2014. Licensee turned in a skin assessment report for patient CR with a completion date of July 15, 2014. Licensee turned in a skin assessment report for patient RB with a completion date of July 22, 2014. The DOH questioned Licensee about the dates on the skin assessments. Licensee admitted to the DOH that she had been using multiple assessment order for some of her patients to cover two (2) different skin assessment reporting periods.

Probation 07/15/2015 to 07/15/2016

Drury, Sasha
Columbus, MO
Registered Nurse 20060010191
On July 12, 2013 at 21:00, pharmacist CC received a telephone prescription call from_patient. The prescription order was for Xanax and was requested by nurse JS for patient PD. The prescription was allegedly ordered by doctor PB. Doctors PB and RH both stated that they did not order any prescriptions of Xanax on the evening of July 12, 2013. Nurse JS stated that she left around 20:30 and did not call in any prescripions. Licensee admitted that she called in the prescription for another nurse’s name and a false patient name and attempted to pick up the prescription.

Probation 06/30/2015 to 06/30/2018

Townsend, Dennis James
Port Charlotte, FL
Registered Nurse 2010019234
On December 4, 1996, Applicant pled guilty to the class B misdemeanor of driving while intoxicated. On August 26, 2010, Applicant pled guilty to operating a motor vehicle while under the influence of liquor-drugs.

Probation 08/26/2015 to 08/26/2016

Poh, Anmee Sue
Lee’s Summit, MO
Licensed Practical Nurse 2010035762
On August 19, 2013, Respondent presented to agency a signed clearance noting that a urine sample was collected on August 17, 2013, in a patient’s home. That day, the patient in question was taking psychiatric medications. Before January 2, 2013, Respondent had been placed in “full code” status. At around 3:15 A.M. on January 14, 2012, Applicant pled guilty to class A misdemeanor of driving while intoxicated. At the time of sentencing, Respondent had signed a letter of interest and CV to academicaffairs@jbu.edu

Submit electronically as attachments

Certified (CMS) and Joint Commission Accredited (TJC) Forensic Psychiatric Facility

Probation continued...

investigation.

Probation 07/07/2015 to 07/07/2016

Rawlings, Rachelle Nora
Saint Joseph, MO
Registered Nurse
On October 1, 2013, Licensee pled guilty to the class B misdemeanor of driving while intoxicated. As a result of the driving while intoxicated arrest, Licensee’s driver’s license was revoked for points on or about November 12, 2013. Licensee previously reported receiving two (2) previous driving while intoxicated infractions that were prosecuted through the Municipal Court of Saint Joseph, Missouri, on April 17, 1999 and April 17, 2002. The Board did not take action on those charges; however, the plea of guilty to driving while intoxicated is Licensee’s third driving while intoxicated case.

Probation 06/16/2015 to 06/16/2017

Bishop, Sarah Rebecca
Saint Charles, MO
Registered Nurse 2006002346
On September 21, 2012, Licensee was assigned a patient who was a fall risk. The Licensee documented three (3) separate times that the patient’s bed alarm and “Care View,” were “armed” and “monitored.” At approximately 12:30 p.m. on that day, the patient was found on the floor. Neither the bed alarm nor the Care View was on. When questioned, the Licensee admitted that she did not check herself if the alarms were on, and that she took the word of the outgoing nurse that both alarms were armed and monitored.

Probation 06/06/2015 to 06/06/2016

Walker, Kenya Monique
Grandview, MO
Registered Nurse 2006020534
On July 19, 2007, Respondent tested positive for methadone during a pre-employment drug screen. Respondent did not have a valid prescription to possess methadone. Respondent has failed to call in a pre-employment drug screen. Respondent did not have a valid prescription to possess methadone. Respondent has failed to call in to NTS on fifty-five (55) days. Respondent failed to call in NTS on June 11, 2012, and has not called in since that date. Furthermore, on May 29, 2013, and June 10, 2013, Respondent called NTS and was advised that she had been selected to provide a urine sample for screening. Respondent failed to report to a collection site to provide the urine sample on September 18, 2013; and on June 28, 2013, July 15, 2013; and July 25, 2013, Respondent failed to call NTS; however, all days were that Respondent had been selected to submit a sample for testing. Therefore, Respondent failed to report to a collection site to provide a sample for testing on June 28, 2013; July 15, 2013; and July 25, 2013.

Probation 07/02/2015 to 05/02/2019

Smith, Leslie A.
Carthage, MO
Registered Nurse 1532324
On October 2, 2013, Respondent was providing care for patients who were going into surgery. Respondent had finished up on her first case and went to pre-op to get her next patient who was assigned to her, patient CP. Respondent observed Dr. S talking to a patient and assumed that the patient’s bed alarm and “Care View,” were “armed” and “monitored.” At approximately 12:30 p.m. on that day, the patient was found on the floor. Neither the bed alarm nor the Care View was on. When questioned, the Licensee admitted that she did not check herself if the alarms were on, and that she took the word of the outgoing nurse that both alarms were armed and monitored.

Probation 06/06/2015 to 06/06/2016

Missouri State Board of Nursing  •  Page 11

November, December 2015, January 2016

PROBATION continued...

John Brown University, private, evangelical, and Christian, is seeking four full-time faculty members for its BSN program.

EARNED doctorate preferred; MSN in nursing required.

John Brown University, Olive Springs, AR. Phone: 479.524.7129. Minorities are encouraged to apply.

Visit www.nursingALD.com to gain access to 600+ issues of official state nurses publications, all to make your job search easier!
On January 27, 2015, Respondent submitted a urine sample for random drug screening. That sample tested positive for the presence of marijuana. The Board did not receive an employer evaluation or statement of unemployment by the documentation due date of February 27, 2015.

Probation 07/22/2015 to 07/22/2020

Bowers, Christeda Ryan
Verden, OK
Licensed Practical Nurse 2006025548

On May 28, 2013, and June 17, 2013, Respondent wrote letters to the Board disclosing that she had illegally obtained and used marijuana on February 24, 2014, and that she had been arrested and prosecuted for it in the state of Oklahoma.

Probation 07/22/2015 to 07/22/2018

Shaw, Tonya Dione
Independence, MO
Registered Nurse 2009023492

On March 17, 2015, Respondent submitted a urine sample for random drug screening. That sample tested positive for the presence of marijuana. On March 24, 2015, Respondent called NTS and was advised that she had been requested to do so.

Probation 06/30/2015 to 06/30/2016

Licensed Practical Nurse 030970
On or about September 9, 2014, a resident (MW) could not be located in the facility, leading to a review of the resident's chart. The chart review showed that Licensed Practitioner had documented that she had obtained vital signs and performed an assessment on the resident at 4:00 am on September 9, 2014, as if she had physically touched and assessed her. She documented her pulse, temperature, blood pressure and respiration. She further documented that the patient was able to voice concerns; his skin was warm and dry, and that the patient did not have shortness of breath or cough. Further investigation revealed the resident left the building at 10:33 pm on September 8, 2014 and was not present at the facility for Licensed Practitioner to perform an assessment or obtain her vital signs.
Probation 06/25/2015 to 06/25/2016.

Monger, Christina E.
Columbia, MO
Registered Nurse 153415
On or about February 2, 2014, Licensed Practitioner informed that patient NS had run out of Gabapentin. Licensed Practitioner was unable to contact the pharmacist and get a new order for Gabapentin to the pharmacy. Licensed Practitioner noted nineteen Gabapentin pills in a plastic bag and gave them to the staff on February 2, 2014. Licensed Practitioner stated that she borrowed nineteen Gabapentin from another patient so that patient NS would have her medication until the new order arrived. On February 12, 2014, Licensed Practitioner was suspended pending an investigation into Licensed Practitioner taking medication from one patient and giving that medication to patient NS. After Licensed Practitioner had been told that she was suspended, Licensed Practitioner went to the Home and accessed the locked medication cart at that home. Licensed Practitioner was seen pulling out some medication cards and a controlled drug administration record (CDAR). Licensed Practitioner went back to the main office with the bag of Gabapentin pills and attached CDAR for patient NS as well as a CDAR for patient AH. The CDAR for patient AH indicated that Licensed Practitioner took 19 Gabapentin pills from patient AH. The Gabapentin pills in patient AH's medical cards are green. Licensed Practitioner was placed on the Missouri Department of Mental Health Employee Discipline Regisracy for a period of ten (10) years, effective September 16, 2014.
Probation 06/16/2015 to 06/16/2017

Luttrell, Amy Nicole
Jackson, MO
Licensed Practical Nurse 2014.038846
On October 7, 2014, Licensed Practitioner was assigned to work in one of the buildings. Licensed Practitioner was the only nurse working in that building. There was a second nurse, nurse RS was assigned to another building. That afternoon, nurse RS went to retrieve medication for a patient from the locked cabinet located in the medication cart. According to the investigation, the RN found nurse RS noted a发现 not ordered a noted discovered a note from Licensed Practitioner indicating that she was leaving work early. RS also found the facility keys assigned to Licensed Practitioner as well as the on-call cellular phone. RS was not assigned to Licensed Practitioner. RS did not inform nurse RS that she was leaving the facility early. Surveillance video revealed nurse RS was found moving her car at 9:07 pm. Nurse left the building at 12:33 pm and did not return. The Administrator spoke to aide BM, who had been working in the same building with Licensed Practitioner. BM stated that early in the shift, Licensed Practitioner had told her that Licensed Practitioner might be leaving early, but never said when she was actually leaving. Licensed Practitioner left her patients without informing anyone that she would no longer be caring for them, and without reporting off on her patients' conditions.
Probation 06/25/2015 to 06/25/2018

Randazzo, Trisha Kaye
Liberty, MO
Registered Nurse 201301117
On the overnight shift of February 28 through March 1, 2013 Licensed Practitioner made the following medication errors: Patient BB was scheduled to receive 12.5 to 25 mg of fentanyl every three (3) hours, as needed. Licensed Practitioner withdrew 100 mg of fentanyl for patient BB at 2019, 2126, 2248, 0033, 0428, 0447, 0629 and 0743 for a total amount of 900 mg. Licensed Practitioner documented the administration of the 125 mg of fentanyl to patient BB at 2013, 2234, 0303, 0213, 0356, 0252, and 0619, and 25 mg of fentanyl at 0825, for a total of 125 mg administered. Licensed Practitioner documented the waste of 175 mg of fentanyl at 2228, 1657, 0054 at 0800, and 50 mg of fentanyl at 0833 for a total of 337.5 mg of fentanyl wasted for patient BB. Licensed Practitioner failed to document the administration or waste of 475.5 mg of fentanyl. On the overnight shift of March 4 through March 5, 2013 Licensed Practitioner made the following medication errors: Patient PB was scheduled to receive 25 to 50 mg of fentanyl every two (2) hours, as needed. Licensed Practitioner withdrew 100 mg of fentanyl for patient PB at 1906, 2017, 2205, 2331, and 0312 for a total amount of 500 mg. Licensed Practitioner documented the administration of 25 mg of fentanyl to patient PB at 1916, 2019, 2313, 2224, 2359, 0453, and 0552 for a total of 175 mg administered. Licensed Practitioner documented the waste of 225 mg of fentanyl for patient PB at 0229. Licensed Practitioner failed to document the administration or waste of 420 mg of fentanyl. On the overnight shift of March 14 through March 15, 2013 Licensed Practitioner made the following medication errors: Patient EC was scheduled to receive 12.5 to 25 mg of fentanyl every three (3) hours, as needed. The error changed to every two (2) hours, as needed, at 0400 on March 15, 2013. Licensed Practitioner withdrew 100 mg of fentanyl for patient EC at 2030, 2039, 2141, 2221, 2357, 0149, 0343, 0130, 0538, 0542, 0546, 0543, 0542, and 0541 for a total amount of 1600 mg. Licensed Practitioner documented the administration of 125 mg of fentanyl to patient EC at 2030, 2226, 2305, 0105, 0240, 0044, 0530, 0536, and 0724 for a total of 125 mg administered. Licensed Practitioner documented the waste of 100 mg of fentanyl at 2206, 1875 mg at 2222, 1875 mg at 0222, 75 mg at 0435, 875 mg at 0547, 875 mg at 0548, 175 mg at 0654, for a total of 800 mg of fentanyl wasted for patient EC. Licensed Practitioner failed to document the administration or waste of 675 mg of fentanyl. On the overnight shift of April 5 through April 6, 2013 Licensed Practitioner made the following medication errors. Patient LC was scheduled to receive 50 mg of fentanyl every two (2) hours, as needed. Licensed Practitioner withdrew 100 mg of fentanyl for patient LC at 1902, 2007, 2244, 0018, 0348, and 0443 for a total amount of 700 mg. Licensed Practitioner documented the administration of 50 mg of fentanyl to patient LC at 2011, 2234, 0510, 0351, 0341, and 0333 for a total of 300 mg administered. Licensed Practitioner documented the waste of 50 mg at 1841, 100 mg at 1936, and 50 mg at 0254 for a total of

Moss, Savina Maria
Pevly, MO
Licensed Practical Nurse 2007031266
From May 7, 2014 until her termination on August 1, 2014, licensee, did not visit one patient assigned to her twice, and did not turn his heat on the affected areas and rest. Respondent did not take his vital signs. At approximately 8:15 pm on that date, MS was found sitting against a wall. He stated his head felt heavy and was assisted to his bed. It was noted that MS suffered a ruptured spleen.

Probation 07/15/2015 to 07/15/2020

Robiniett, James W., Jr.
Poplar Bluff, MO
Registered Nurse 116003
Respondent worked as a staff nurse in the ER of a hospital and was injured while working on July 24, 2013. On July 24, 2013, Respondent submitted a sample for a drug test required by the hospital's policies as a result of the injury. The hospital received the results of the drug test and Medical Review Officer's report on July 30, 2013. The test was positive for THC, a metabolite of marijuana.

Probation 07/09/2015 to 07/09/2020

Choate, Kelly Renee
Springfield, MO
Registered Nurse 1308386
On June 11, 2013, several of Licensee's coworkers reported that Licensee appeared to be impaired and was slurring words and acting erratically. Licensee’s coworker pulled Synthroid from the Pyxis for a patient who was not prescribed Synthroid. It was also discovered that Licensee was not screening medications as required.

Probation 07/09/2015 to 07/09/2019

PROBATION continued...

Licensee failed to document on her patients' charts, and what she did document did not make any sense. Licensee was asked to return and complete her documentation. Licensee was also unable to make sense of what she had documented. On June 13, 2015, administrators found that Licensee submitted a sample for a for-force drug test because of her actions on June 11, 2013. Licensee initially consented to complete her documentation, but later decided not to submit a sample and voluntarily resigned.

Probation 08/29/2015 to 09/02/2015

Candil, Christie Ann
Cleburn, MO
Licensed Practical Nurse 2013042551
On December 29, 2014, licensee pled guilty to endangering the welfare of a child. The Information filed with court in reference to Respondent's case was dismissed in particular_, that on or about September 26, 2014, [licensee] knowingly encouraged [her three] children [ages 5, 7, and 11] to enter into a structure that is a public nuisance. By having multiple pots of a controlled substance in her residence in an unlabeled bottle without a prescription. Licensee admitted to the Board's investigator that, in regard to the unlabeled bottle, 'all but one of those pills I had prescriptions for and the other pill was one I had from a friend when I was out. I took one of the pills and the other was in the pill bottle.' The two pills in question contained Hydrocodone. Licensee did not have a prescription for Hydrocodone.

Probation 07/01/2015 to 07/15/2020

Cox, Denise L.
Buffalo, MO
Licensed Practical Nurse 024250
On August 8, 2013, Respondent falsified a home visit for patient KM by documenting that she had visited KM in her home when she had not. Among other misrepresentations, Respondent falsified documentation and falsified a signature on the visit paperwork. KM was actually in the ICU of a local hospital at the time. Respondent then gave a two-week notice stating she would no longer work up until that date. Respondent last saw patients on August 20, 2013. On and after that date until her separation on September 6, 2013, Respondent failed to document on her patients' charts, and what she did document did not make any sense. Licensee was asked to return and complete her documentation. Licensee was also unable to make sense of what she had documented. On June 13, 2015, administrators found that Licensee submitted a sample for a for-force drug test because of her actions on June 11, 2013. Licensee initially consented to complete her documentation, but later decided not to submit a sample and voluntarily resigned.

Probation 08/29/2015 to 09/02/2015

Frazier, Miranda Lynn
Columbia, MO
Licensed Practical Nurse 201301916
Respondent did not attend the meeting or contact the Board to schedule random witnessed screening for alcohol and other drugs of abuse within five (5) weeks of the effective date of the Order, which was January 14, 2015. Respondent did not complete the contract process with NTS until February 2, 2015. On February 12, 2015, March 2, 2015, and April 10, 2015, Respondent called NTS and was advised that she had been selected to provide a urine sample for screening. Respondent failed to report to the testing site to provide the requested sample on each of those dates. Respondent was required to obtain continuing education hours and have the certificate of completion for all hours submitted to the Board approved third party administrator, currently National Toxicology Specialists, Inc. (NTS), to schedule random witnessed screening for alcohol and other drugs of abuse within five (5) weeks of the effective date of the Order, which was January 14, 2015. Respondent did not complete the contract process with NTS until February 2, 2015. On February 12, 2015, March 2, 2015, and April 10, 2015, Respondent called NTS and was advised that she had been selected to provide a urine sample for screening. Respondent failed to report to the testing site to provide the requested sample.
2014, the creatinine reading was 9.6. Respondent's creatinine reading was 16.8. A creatinine reading below 16.8 is deemed a diluted sample and is considered a failed test. Pursuant to the terms of Respondent's probation, Respondent was to submit an employer evaluation from every employer or, if Respondent was unemployed, a statement indicating the periods of unemployment. The Board did not receive an employer evaluation or statement of unemployment by the due date of November 21, 2014. Pursuant to the terms of the Agreement, Respondent was required to submit a chemical dependency update to the Board quarterly with a documentation due date of February 6, 2015. The Board did not receive a chemical dependency update submitted on Respondent's behalf.

Revoked 09/12/2015

Wright, Melissa Ann
Salt Lake, UT
Registered Nurse 2009003705

The Kansas State Board of Nursing disciplined Respondent's license upon grounds for which revocation is suspended in this State.

Revoked 07/15/2015

Frame, Timothy Kirk
Kansas City, MO
Registered Nurse 2004001961

The Board did not receive an employer evaluation or statement of unemployment by the due date of November 21, 2014. Pursuant to the terms of the Agreement, Respondent was required to submit a chemical dependency evaluation to the Board within eight weeks of the effective date of the Agreement, or by October 16, 2014. The Board did not receive a thorough chemical dependency evaluation submitted on Respondent's behalf. In accordance with the terms of the Agreement, Respondent was required to meet with representatives of the Board at such times and places as required by the Board. Respondent was advised by certified mail to attend a meeting with the Board's representative, which was rescheduled twice, the last time, on November 4, 2014. Respondent did not attend the meeting.

Revoked 09/10/2015

Foraker, Nancy Jo
Kennett, MO
Licensed Practical Nurse 2009019737

On October 30, 2009, Respondent was counseled on the issues of not following physician orders as directed, borrowing medications from other patients, incomplete telephone orders, and orders improperly transcribed into the MAR. Respondent was directed to mark the medication cards when she gives medications, to not borrow medications from coworkers and for failing to complete neurological checks on those five days. In addition, on nine separate occasions, May 2, 2014; May 27, 2014; June 13, 2014; June 23, 2014; July 17, 2014; January 29, 2015; February 4, 2015; March 23, 2015; and April 17, 2015, Respondent reported to lab and submitted the required sample which showed a low creatinine reading. Pursuant to the Agreement, a creatinine reading below 2.0 is deemed a diluted sample and a failed drug and alcohol test. On December 8, 2014, Respondent reported to a collection site to provide a sample for drug and alcohol testing, and the sample tested positive for Ethyl Glucuronide (EtG), a metabolite of alcohol. On January 19, 2015, Respondent reported to a collection site to provide a required blood sample, which was positive for Phosphatidyl ethanol (PEth), a metabolite of alcohol. The Board did not receive an employer evaluation or statement of unemployment by the Board.

Revoked 07/13/2015

Akers, Stephanie Jane
Union, MO
Registered Nurse 2004019784

From January 20, 2015 through April 22, 2015, Respondent failed to call in to NTS on twenty-two (22) separate days. Further, on March 24, 2015, and April 17, 2015, Respondent called NTS and was advised that she had been selected to provide a urine sample for screening. Respondent failed to report to a collection site to provide the requested sample on those five days. In addition, on nine separate occasions, May 2, 2014; May 27, 2014; June 13, 2014; June 23, 2014; July 17, 2014; January 29, 2015; February 4, 2015; March 23, 2015; and April 17, 2015, Respondent reported to lab and submitted the required sample which showed a low creatinine reading. Pursuant to the Agreement, a creatinine reading below 2.0 is deemed a diluted sample and a failed drug and alcohol test. On December 8, 2014, Respondent reported to a collection site to provide a sample for drug and alcohol testing, and the sample tested positive for Ethyl Glucuronide (EtG), a metabolite of alcohol. On January 19, 2015, Respondent reported to a collection site to provide a required blood sample, which was positive for Phosphatidyl ethanol (PEth), a metabolite of alcohol. The Board did not receive an employer evaluation or statement of unemployment by the Board.

Respondent falsely claimed that BN complained of pain in his back. Upon discovering Respondent's mistake, she failed to chart it in the patient's records or in any other information. When confronted about this mistake by officials, Respondent falsely claimed that BN complained of pain in his “bottom.”

Revoked 07/10/2015

Sencoby, Jessica Lynne

Perryville, MO

Licensed Practical Nurse 2007032150

Respondent was advised by certified mail to attend a meeting with the Board's representative on August 5, 2014. Respondent left a voice mail message for the Board on August 4, 2014, stating she could not attend the meeting and did not request to re-schedule the meeting. From August 18, 2014 through February 9, 2015, Respondent failed to call in to NTS on three (3) days. In addition, on January 6, 2015, Respondent reported to lab and submitted the required sample which showed a low creatinine reading. On February 3, 2015, Respondent submitted a urine sample for random drug screening. That sample tested positive for the presence of methamphetamine.

Revoked 07/10/2015

Brundridge, Misty Dawn

Rich Hill, MO

Licensed Practical Nurse 2008084721

Respondent was employed as an LPN at a nursing home. In March and April 2013, Respondent repeatedly administered medication to the wrong patient in a two-patient room. She administered the medications to BN that were meant for EB. Once Respondent discovered her mistake, she failed to chart it in the patients' records or in any other information. When confronted about this mistake by officials, Respondent falsely claimed that BN complained of pain in his “bottom.”

Revoked 07/10/2015

Mathis, Christina Marie

Edgerton, KS

Registered Nurse 2010836321

Respondent was advised by certified mail to attend a meeting with the Board's representative on August 5, 2014. Respondent left a voice mail message for the Board on August 4, 2014, stating she could not attend the meeting and did not request to re-schedule the meeting. From August 18, 2014 through February 9, 2015, Respondent failed to call in to NTS on three (3) days. In addition, on January 6, 2015, Respondent reported to lab and submitted the required sample which showed a low creatinine reading. On February 3, 2015, Respondent submitted a urine sample for random drug screening. That sample tested positive for the presence of methamphetamine.

Revoked 07/10/2015

Waters, Rex Allen

Prairie Village, KS

Registered Nurse 2011040756

Respondent's nursing license was disciplined in the State of Kansas upon grounds for which suspension or revocation is authorized in this State.

Revoked 07/10/2015

Gales, Desiree L.

Florissant, MO

Licensed Practical Nurse 2009026321

On July 23, 2013, the Board received correspondence from Respondent in response to another investigation regarding Respondent's license. Respondent submitted numerous patient records and documents to the Missouri State Board of Nursing, including the Progress Note Addendum (narrative documentation on the patient's medical record), Physical Assessment Sheet of the patient, Intake and Output Record, and Hourly Time Sheet of Nurse in reference to patient, D.M. Patient, D.M., is a patient Respondent cared for during her employment. The documents contained patient health care information which Respondent was not authorized to maintain in possession or disclose. Respondent wrongfully and intentionally disclosed a patient's health care information to the Missouri State Board of Nursing in an attempt to forgo discipline on her license thereby violating the Health Insurance Portability and Accountability Act.

Revoked 06/16/2015

Sloniker, Tracy D.

West Plains, MO

Registered Nurse 1442701

On April 8, 2013, Respondent was responsible for providing in-home care to client LC. Client LC's mother discovered Respondent sleeping at 6:00 am when she awoke to get her other child ready for school. Upon discovering Respondent asleep, client LC's mother checked the medical records and monitoring equipment to see if Respondent LC had received her 4:00 am breathing treatment. Client LC's mother saw no documentation in client LC's chart for Respondent's shift, and saw no information in the monitoring equipment to indicate that LC had received the 4:00 am breathing treatment.

Respondent completed her documentation for client LC's chart at home, after her shift had ended. Respondent documented that she had performed LC's breathing treatment at 4:30 am. Respondent admitted to SC that she had fallen asleep while on duty, that she had forgotten to complete the breathing treatment, and that she took her paperwork home to complete her documentation. Respondent falsely claimed that she had completed LC's breathing treatment.

Revoked 03/09/2015

Evers, Hope D.

Fenton, MO

Licensed Practical Nurse 028588

On May 20, 2013, respondent reported to work for the evening shift. Respondent was observed still wearing her sunglasses inside the building and observed with red eyes when they were removed. Respondent appeared to be confused, had trouble concentrating, and prepared a dose of Coumadin for a patient at 3 pm which was not due until 6 pm. Respondent smelled of intoxicants. Officials, upon speaking with her, requested she submit to a drug and alcohol test. Respondent did not report to the testing site for the drug and alcohol test as required.

Revoked 06/16/2015

Gregg, Carol W.

Saint Louis, MO

Licensed Practical Nurse 028588

On January 8, 2013, at around 8:15 PM, Respondent found resident KT on the floor of KT’s room. Respondent did not ask resident KT if she had fallen to the floor. Respondent failed to assess resident KT’s condition or perform an assessment to look for injuries. Respondent failed to assist resident KT in getting up off the floor. Respondent failed to chart that resident KT was discovered on the floor. Respondent gave resident KT her evening medicines while KT was still on the floor. Respondent was placed on the Missouri Department of Health and Senior Services Employee Disqualification List for a period of eighteen (18) months as a result of this incident, effective November 1, 2013.

Revoked 03/09/2015

Bowman, Christina L.

Ashland, MO

Licensed Practical Nurse 053779

Respondent failed to complete the contract process with NTS. The Board did not receive an employer evaluation or statement of employment by the documentation due date of April 9, 2015. The Board did not receive a thorough chemical dependency evaluation submitted on Respondent's behalf by the due date of May 3, 2015. Respondent did not renew her licensed practical nursing license as required by the Order.

Revoked 03/09/2015

Shaw, Nicole Lynn

O’Fallon, MO

Licensed Practical Nurse 2008024380

On June 7, 2013, officials noticed that various medications, including the controlled substances of Oxycodone and Xanax, were being currently removed from the automated dispensing devices under the “PIN” number of a nurse who had been terminated two weeks before and who no longer worked there. The only nurse present on all shifts in which the PIN number was used during this time period was Respondent. The medications shown to be removed were also

Lees Summit, MO
Licensed Practical Nurse 201303023

Respondent did not attend the meeting with the Board’s representative or contact the Board to reschedule the meeting. Respondent did not complete the contract process with NTS within five (5) weeks of the effective date of the Order, as specified in the terms and conditions of the Board Order. The Board did not receive an employer evaluation or statement of unemployment by the documentation due date of March 17, 2015. The Board did not receive a thorough chemical dependency evaluation submitted on Respondent’s behalf by the documentation due date of February 11, 2015.

Revoked 06/19/2015

Smith, Evelyn D.
Saint Louis, MO
Licensed Practical Nurse 039184

In accordance with the Order, Respondent was required to submit an application to renew her license, along with the required fees and criminal background check within thirty working days of the date of the Order, making the due date August 21, 2014. Respondent failed to submit an application to renew her licensed practical nursing license by the August 21, 2014 due date and her license remains lapsed. In accordance with the terms of the Order, Respondent was required to obtain continuing education. The Board did not receive proof of any completed continuing education hours. The Board did not receive an employer evaluation or statement of unemployment by the documentation due date of January 12, 2015.

Revoked 06/19/2015

Day, Rebecca Lynn
Shelton, MO
Registered Nurse 2009022240

From November 23, 2014 through April 22, 2015, Respondent failed to call in to NTS on one (1) day. Further, on October 31, 2014, and March 16, 2015, Respondent called NTS and was advised that she had been selected to provide a urine sample for screening. Respondent failed to report to a collection site to provide the requested samples. As part of the terms of her probation during the disciplinary period, Respondent was required to completely abstain from the use or consumption of alcohol in any form regardless of whether treatment was recommended. On March 2, 2015, Respondent reported to a collection site to provide a sample and the sample tested positive for Ethyl Glaucoronic (EGL), a metabolite of alcohol.

Revoked 07/16/2015

Molitor, Kristin Marie
Washington, MO
Licensed Practical Nurse 2002029561

Respondent was confronted by officials on November 19, 2013, in regard to her charting and administration of controlled substances, and officials also noticed missing medications during Respondent’s shifts. During November 2013, Respondent, instead of using the MAR system, used her memory during medication passes to patients, resulting in medication errors and the wrong dosages given. She also gave medications at inappropriate times such as at the very beginning of her shift when patients were in the dining room and records revealed she would not even had the keys to the medication cart at that point. On November 18, 2013, Respondent was the last nurse to access Oxycodeone when three tablets were noted to be missing. Respondent could not explain where the tablets were and never clarified that they were administered or wasted. Respondent was then restricted on November 25, 2013, from having access to narcotic keys, counting narcotics, or passing narcotics to patients until further notice. On February 6, 2014 and on April 25, 2014, Respondent called the Schmick’s Pharmacy and pretended that she was an employee in Dr. V’s office by the name of “Trish” and called in two prescriptions for herself for Tramadol. The first prescription on February 6, 2014, was for a quantity of eighty (80) with four (4) refills, which Respondent picked up, in addition to all four (4) refills. The second prescription on April 25, 2014, was for a quantity of 120 Tramadol with four (4) refills. Upon the false prescriptions being discovered, Respondent was arrested and while in custody and after being Mirandized, admitted to the police that she had called in the false prescriptions on February 6, 2014 and April 25, 2014. On July 21, 2014, in Franklin County, Missouri, Respondent was charged with felony forgery as a result of the above incidents, and a warrant issued for her arrest.

Revoked 06/19/2015

Whitehead, Stephanie E.
Saint Louis, MO
Licensed Practical Nurse 045806

On July 18, 2013, a Sentence and Judgment was issued as a result of Respondent pleading guilty on July 18, 2013, to the class C felony of stealing over $500.00.

Revoked 07/15/2015

Leitch, Jill S.
Dittmer, MO
Registered Nurse 20110122773
On January 7, 2013, while on duty as an RN at a hospital, Leitch refused to submit to a urine drug test. The reason Leitch refused to submit to the test was because she had smoked marijuana approximately five days prior. On January 28, 2013, licensee was confronted about her administrations at the hospital and admitted that she had diverted to herself for her own use while working as a nurse at the hospital (Dilaudid, Fentanyl), and Norco. Voluntary Surrender 08/31/2015

Taylor, Megan Nicole
Joplin, MO
Registered Nurse 2009024799
Voluntary Surrender of her license. Voluntary Surrender 08/25/2015

Goldman, Richard E.
Saint Louis, MO
Registered Nurse 123015
On July 22, 2014, Licensee pleaded guilty to one count of embezzlement or theft of public money, property or records in the United States District Court Eastern District of Missouri. Licensee had been charged with voluntarily, intentionally and knowingly converting a quantity of prescription medication to his own use with the intent to deprive the United States of the use and benefit of the same. During an investigation by the Department of Veterans Affairs, Licensee admitted to taking Dilaudid for his personal use. Voluntary Surrender 08/10/2015

Maddux-Wolf, Gaile L.
Mabievale, AR
Registered Nurse 109558
Licencee failed to accurately chart the administration and waste of controlled substances. Voluntary Surrender 08/04/2015

The Board did not receive an employer evaluation or statement of unemployment by the due date of March 18, 2015. The Board did not receive a thorough chemical dependency evaluation by the due date of February 12, 2015. Suspension 07/14/2015 to 01/14/2016

VOLUNTARY SURRENDER

Winchell, Elizabeth Jean
Columbia, MO
Registered Nurse 2012082056
Licensee voluntarily surrenders her license to practice nursing and surrenders her privilege to practice under any multi-state privileges in the State of Missouri. Voluntary Surrender 06/01/2015

Applegate, Nancy L.
Saint Peters, MO
Registered Nurse 146740
On May 23, 2013, Licensee reported to work for her 7:00 PM to 7:00 AM shift in the Emergency Department. On May 24, 2013, at approximately 12:45 AM, Licensee was not in the Emergency Department and could not be located for one (1) hour. On May 24, 2013, at 3:00 AM the Director of Nursing (DON) determined that the census was down and that some of the nurses could go home. The DON selected Licensee as a nurse to go home, but Licensee was not in the Emergency Department and could not be found until 4:30 AM. Licensee was found in the bathroom by her co-workers. The nurses who found Licensee believed that she was impaired. The bathroom where Licensee was found was searched and a butterfly needle, tourniquet, syringe, and two (2) vials of Propofol were discovered. Nurse N reviewed the Pyxis logs after Licensee was found. According to N, Licensee performed a cancelled remove on the 20 ml vial of Propofol for Patient JA, which resulted in a discrepancy in the number of 20 ml Propofol vials in the Pyxis. Patient JA did not have an order for Propofol. According to N, Licensee performed a cancelled remove on nitroglycerin for a fictitious patient, room 8-8. The 50 ml vials of Propofol are located in the same drawer as the nitroglycerin and two (2) vials were missing after Licensee had been in the drawer. On May 24, 2013, according to the Director of Emergency Services (DOES), he reviewed the Pyxis logs and discovered three (3) vials of Propofol missing; one (1) 20 ml vial and two (2) 50 ml vials. DOES contacted Licensee and requested that she come to the hospital to discuss what had happened. While speaking to DOES, Licensee admitted to taking Propofol while on duty. While speaking to DOES, Licensee admitted that she had left the building with one (1) 50 ml vial of Propofol, but threw it out of her car window as she drove away. Licensee marked on a map where she threw the vial out, and DOES later recovered it. After meeting with DOES, Licensee voluntarily went to a facility in St. Charles for an evaluation. During the evaluation, Licensee admitted to using Propofol without a prescription. Licensee did not have a prescription for Propofol. Licensee admitted she used Propofol on May 24, 2013 in a last-ditch effort to alleviate severe back pain.

Voluntary Surrender 08/03/2015

Henry, Jerry N.
Saint Louis, MO
Registered Nurse 095804
Licensee voluntarily surrendered his nursing license on July 27, 2015.

Voluntary Surrender 07/27/2015
ShowMeVax is Missouri’s free immunization registry that:

- is accessible through the web or EMR/EHR systems;
- helps eligible providers with EMR/EHR systems receive incentive payments;
- ensures patients are properly immunized;
- provides secure access for health care providers to patient immunization records (currently 37 million) throughout the state;
- reduces staff time spent obtaining immunization records; and
- simplifies vaccine ordering for the Vaccines for Children program providers.
