COMPLIANCE

SECURITY OF PHARMACY OPERATIONS

1) All areas of the physical plant of the pharmacy where drugs received, stored or dispensed and patient records are maintained are inaccessible by the public.
   (GUIDANCE: It is important that the overall design of the pharmacy does not allow for easy access by the public by individuals overcoming barriers due to inadequate installation or use of inadequate construction materials.)

2) In pharmacies where the hours of the pharmacy department differ from the hours of the facility, all means of access to the pharmacy maintain locks and/or alarms to sufficiently deter access by unauthorized personnel.

3) The pharmacy maintains a locked cabinet, fixture or safe in order to store Class II drugs.

REGULATORY REQUIREMENTS

1) An inventory of controlled substances has been completed at the time of the change of ownership. Date completed: ____________________.

2) The pharmacy maintains current references as required by law.

3) A sink is available with hot/cold running water with an appropriate attachment to a city/county sewer system that is located within or immediately adjacent to the pharmacy and that is not considered a part of a restroom facility.

4) Proper refrigeration for the storage of pharmaceutical products is available. Temperature range is maintained between 36 to 46 degrees F.

5) Prescription files are maintained according to laws governing hard copy records and electronic data records. Hard copy records are retrievable on-site as required by law. Sufficient mechanisms exist in order to provide for the numbering of prescriptions that are dispensed.

6) A secure dispensing area is available within the pharmacy physical plant that contains all required equipment for each class of pharmacy noted on the pharmacy permit.

NOTE: Any pharmacy that chooses to store drugs at another address must report such sites as warehouses. Provide the address of any such locations within the space provided on the reverse side.
If you must answer no to any of the compliance statements on this form, an inspector will contact you in order to assist in gathering further information or in providing guidance for corrective actions.

As pharmacist-in-charge, I attest that the answers provided on this form are true and correct and that the pharmacy complies with all laws and regulations as they pertain to the operation of a pharmacy. I further attest that I have reviewed and understand all responsibilities as pharmacist-in-charge set forth in 20 CSR 2220-2.090 Pharmacist-In-Charge.
